- LEGO Technic High Band 11 Lime Collins Big Cat set (42093)

- Phillips screwdriver
- Pliers
- Patience!

1. Begin by assembling the base of the chassis. This will involve connecting a series of beams and panels together.
2. Once the base is complete, add the side panels and the front and rear bumpers.
3. Next, build the suspension system. This will involve attaching a series of shock absorbers and springs to the chassis.
4. Finally, add the wheels and tires to the chassis.

1. Build the engine block by connecting a series of pistons and cylinders together.
2. Add the camshaft and the crankshaft to the engine block.
3. Connect the engine to the transmission.
4. Finally, add the exhaust system to the engine.

1. Start by building the front end of the body. This will involve attaching a series of panels and stickers to the chassis.
2. Next, build the roof of the body. This will involve connecting a series of curved panels together.
3. Finally, build the rear end of the body. This will involve attaching a spoiler and a rear window to the chassis.

1. Once the body is complete, add the remaining details, such as the headlights, taillights, and mirrors.
2. Finally, test drive your new LEGO Technic High Band 11 Lime Collins Big Cat!
  - **Be patient!** Building the High Band 11 Lime Collins Big Cat can be time-consuming, but it is important to take your time and follow the instructions carefully.
  - **Use a Phillips screwdriver.** A Phillips screwdriver will help you to tighten the screws securely.
  - **Pliers can be helpful.** Pliers can be used to bend and shape the wires that are used to connect the different parts of the car.
  - **Don't be afraid to experiment.** Once you have completed the basic build, you can experiment with different ways to customize your car.

The High Band 11 Lime Collins Big Cat is a thrilling LEGO Technic car that is sure to provide hours of fun and excitement. By following the step-by-step instructions in this guide, you can successfully build your own car and experience the joy of engineering and mechanics firsthand.
