Freestyle music, born in the 1980s, is characterized by its repetitive beats, simple melodies, and emotional lyrics. While it was once a popular genre, freestyle has since fallen out of favor. This article explores the reasons for freestyle's decline, and argues that the genre's emphasis on loneliness and isolation may have contributed to its downfall.

## The Rise and Fall of Freestyle

Freestyle music emerged in the early 1980s in New York City. It was a fusion of disco, soul, and Latin music, and it quickly became popular in the city's underground dance clubs. Freestyle's popularity spread to other parts of the United States and Europe in the mid-1980s, and it was soon one of the most popular genres of dance music.

However, freestyle's popularity began to decline in the late 1980s. There are several reasons for this decline, including the rise of new genres of dance music, such as house and techno, and the changing musical tastes of the public. However, I believe that freestyle's emphasis on loneliness and isolation may have also contributed to its downfall.

## **The Loneliness of Freestyle**

Freestyle music is often characterized by its lyrics about loneliness and isolation. This is evident in some of the genre's most popular songs, such as "Break the Ice" by Twice as Nice.

I'm standing here all alone Nobody seems to notice me I'm just a face in

This song is about a person who feels lonely and isolated in a crowded dance club. This is a common theme in freestyle music, and it is one of the things that sets it apart from other genres of dance music.

## **The Isolation of Freestyle**

In addition to its lyrics about loneliness, freestyle music is also characterized by its repetitive beats and simple melodies. This can create a sense of isolation for the listener, as it can be difficult to connect with music that is so repetitive and simple.

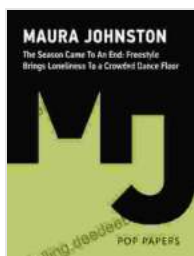

This isolation is further compounded by the fact that freestyle music is often played in large dance clubs. This can make it difficult for people to connect with each other, as they are all dancing to the same music and there is little opportunity for conversation.

## **The Downfall of Freestyle**

I believe that the emphasis on loneliness and isolation in freestyle music may have contributed to its downfall. While these themes may have resonated with some listeners, they may have also turned off others. In addition, the repetitive beats and simple melodies of freestyle music may have made it difficult for people to connect with the genre.

Freestyle music is a unique and interesting genre of dance music. However, its emphasis on loneliness and isolation may have contributed to its downfall. While these themes may have resonated with some listeners, they may have also turned off others. In addition, the repetitive beats and simple melodies of freestyle music may have made it difficult for people to connect with the genre.

Despite its decline in popularity, freestyle music remains a popular genre among some dance music fans. There are still a number of freestyle clubs and events throughout the world, and the genre continues to be played on radio stations and dance mixes.
