

How to Win at Craps: A Comprehensive Guide to Mastering the Game

Craps is a classic casino game that has been enjoyed by people for centuries. It is a fast-paced and exciting game that can be very rewarding if you know how to play it.

In this guide, we will teach you everything you need to know about craps, from the basics of the game to some advanced strategies that can help you win more money.

Craps is a dice game that is played on a table with a layout that is divided into two halves. The first half of the table is called the "come out" section, and the second half is called the "point" section.

The game begins with the "come out" roll. The shooter rolls two dice, and the number that they roll is called the "point." If the shooter rolls a 7 or 11, they win. If the shooter rolls a 2, 3, or 12, they lose. Any other number

becomes the point, and the shooter must roll that number again before they roll a 7 to win.

If the shooter rolls the point number again before they roll a 7, they win. If they roll a 7 before they roll the point number, they lose.

There are many different bets that you can make in craps. The most common bets are:

- **Pass line bet:** This bet wins if the shooter rolls a 7 or 11 on the come out roll, or if they roll the point number again before they roll a 7.
- **Don't pass line bet:** This bet wins if the shooter rolls a 2 or 3 on the come out roll, or if they roll a 7 before they roll the point number.
- **Come bet:** This bet is similar to the pass line bet, but it is made after the come out roll. You can make a come bet on any number that is not a 7 or 11.
- **Don't come bet:** This bet is similar to the don't pass line bet, but it is made after the come out roll. You can make a don't come bet on any number that is not a 7 or 11.
- **Field bet:** This bet wins if the shooter rolls a 2, 3, 4, 9, 10, 11, or 12 on the come out roll.
- **Proposition bet:** These bets are made on specific combinations of numbers that the shooter might roll. For example, you can bet on the shooter rolling a pair of aces, or you can bet on the shooter rolling a 7 out of 10 rolls.

There are a few different strategies that you can use to increase your chances of winning at craps. Some of the most common strategies include:

- **Betting the pass line:** The pass line bet is one of the most popular bets in craps, and it is also one of the safest. The house edge on the pass line bet is only 1.41%, which makes it a good bet for beginners.
- **Betting the don't pass line:** The don't pass line bet is the opposite of the pass line bet. It wins if the shooter rolls a 2 or 3 on the come out roll, or if they roll a 7 before they roll the point number. The house edge on the don't pass line bet is also 1.41%.
- **Betting the come bet:** The come bet is a good bet to make after the come out roll. It has a house edge of 1.41%, and it wins if the shooter rolls the number that you bet on again before they roll a 7.
- **Betting the don't come bet:** The don't come bet is the opposite of the come bet. It wins if the shooter rolls a 7 before they roll the number that you bet on. The house edge on the don't come bet is also 1.41%.
- **Betting the field bet:** The field bet is a good bet to make if you are looking for a high-risk, high-reward bet. It has a house edge of 5.56%, but it can pay out very well if you win.

Craps is a fun and exciting game that can be very rewarding if you know how to play it. By following the tips in this guide, you can increase your chances of winning and have a great time playing craps.
