The Multiverse

and tips to help you live in it

The Dimensional Theory of Reality states that for every decision that is made, the alternative decision is played out in another reality. There is an infinite number of parallel universes where every possibility exists. By breaking the speed of reality you can cross dimensions and arrive in such a universe. See Figure 1.1. The illustration demonstrates what scientists are now referring to as a 'Dimension Jump' in which the subject is able to transcend from one dimension to another with the use of a 'transdimensional portal'.
